

How much saliva do I need to provide?

IMPORTANT

Tube must have 1ml of saliva otherwise specimen may be rejected

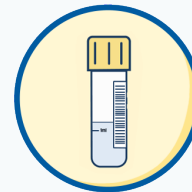

Remove lid from tube.

Tilt your head forward and
allow saliva to pool in the front
of your mouth.

Gently dribble the saliva
forming in your mouth into the
tube. Keep going until there is
at least 1ml in the tube.

Screw the lid back on the tube
carefully, make sure it's tight.
